

Rafael Negrão de Souza

Jr. Data Engineer

PROFESSIONAL SUMMARY

Data Analyst and Software Developer with experience building internal applications, ETL pipelines, dashboards and process automation solutions. Skilled in Python, SQL, Power BI, Node.js and Electron. Background in Production Engineering with a focus on operational efficiency and data-driven decision making.

PROFESSIONAL EXPERIENCE

Data Analytics Intern Cummins Inc

Apr 2025 – Present

- Architected and built the Tooling Control App (Electron.js, Node.js, SQLite), a multi-user desktop system with relational data modeling for industrial tooling lifecycle management.
- Identified tooling with early obsolescence through the application, generating a \$240,000 reimbursement.
- Automated ETL pipelines and data versioning with Python, reducing manual rework for the operation.
- Built Power BI dashboards and wrote optimized SQL queries for KPI monitoring and decision support.
- Documented technical requirements and owned the development cycle from requirements gathering to production deployment.

Data Analyst FG Assessoria Contábil (Accounting Firm)

Aug 2023 – Feb 2025

- Built a full stack application for client data consolidation and integration with Python, TypeScript and SQL.
- Structured ETL pipelines for data cleaning, transformation and automated reporting, eliminating manual processing.
- Worked in short delivery cycles using agile methodologies (Scrum/Kanban), prioritizing technical backlog with the team.
- Applied predictive analysis to client history to identify purchase propensity patterns, working alongside a 9-person team. Result: a 67% increase in certificate sales.

Production Coordinator Itiban Pescados

Apr 2019 – Dec 2022

- Built a Python desktop application (PyQt6) integrated with the Google Maps API for algorithmic fleet route optimization.
- Contributed to a 23% reduction in diesel consumption through the implemented solution.
- Managed an operations team, coordinating activities and tracking performance and execution indicators.

EDUCATION

Systems Analysis and Development

Universidade Presbiteriana Mackenzie · 2026 – 2028

Production Engineering

Universidade Cruzeiro do Sul · 2022 – 2026 · GPA: 9.12/10

Portfolio

Vila Matilde, São Paulo/SP

SKILLS

- Python
- TypeScript & Node.js
- SQL & Data Modeling
- REST APIs
- Electron.js
- ETL & Process Automation
- Power BI
- Advanced Excel (VBA)
- C#
